Three Cutting Edge Topics in LGBTQ+ Mental Health

- **Gender Fluidity & Transgender**
- **Polyamory & Non-Monogamy**
- **Compassion & Oppression Fatigue
for LGBTQ+ Mental Health
Providers**

**A Unique and
Powerful
Mental Health
Conference**

There is increased validity, depth and credibility when mental health providers speak openly about clinical issues that they experience both professionally and personally. This is especially important, and respectful, when the topics relate to populations who experience discrimination, oppression and judgment; as is true with each of the topics that we are discussing during this conference.

LGBT Therapists

Presented by 3 speakers and 8 panelists who are in the mental health field and also have personal lived experience with their topic and they will talk about it.
